

PRODUCT BULLETIN

Product PROFILE #053 - 16-Groove Belt Drive

Standard Features

- **Flanged** blower & motor pulleys ensure proper installation and belt tracking
- Increased number of belt strands **reduce** load per strand increasing belt life
- Durable in “**severe duty**” environments where dirt, moisture, and high temperatures are factors
- 16G drive has large diameter cut outs in the motor pulley to **increase cooling**, reduce weight, and ensure optimum balance condition
- Plated steel motor pulley (SS optional) eliminates the groove wear of the hard anodized 12G motor Pulley
- Flanges protect belt grooves from damage
- Steel pulleys can be cleaned by wire brush without damage to the grooves

Added Benefits

- Flanged blower & motor pulleys eliminates belt “walking”
- Serves as a “severe duty” drive for all Sonic 70 thru 200 applications where dirt, moisture and/or high temperature would cause reduced belt life
- **Also available is the “severe duty” Belt Tensioner which implements a Stainless Steel Idler pulley, increased spring tension, and an industry first Dual Idler Bearing assembly**
