

Upgrade to Sonic Air

Sonic Air Systems, the leading innovator of drying and blow-off systems, has now made even more improvements. As Sonic constantly strives to make improvements we do not live by the saying “if it’s not broke, don’t fix it”. We believe with ever growing improvements will only serve our customers and retain our title of the leading innovator and provider of drying and blow-off systems.

1 Pulley Seal

- Durable in “severe duty” environments
- Eliminates all possible contamination of bearings
- Pulley can be removed for cleaning without exposing bearings to contaminants

2 Idler Arm Assembly

- Double Bearing
- Teflon® Wear strip on backside to prevent casting wear
- Greater spring tension

3 2-pc Pulley

- Pulley and Hub separated to eliminate contamination of bearings during belt or pulley change over
- Stainless Steel 16-Groove pulley is Flanged to eliminate belt “walking” and ensure proper installation
- Increased number of belt strands reduce load per strand, increasing belt life

4 16-G Motor Pulley

- Flanged pulley ensures proper installation and belt tracking
- Zinc Plated Steel construction for “severe duty” environments
- Large diameter cut-outs increase cooling, and reduce weight
